PROFILE

Driven Software Engineer who is a certified cloud practitioner with a First-Class degree and hands-on industry experience. From building scalable web apps to solving real-world tech challenges at Accenture, I combine a passion for clean code with a curiosity for innovation. I thrive on turning ideas into impactful software and am eager to keep pushing boundaries while growing with collaborative, forward-thinking teams.

CODING SKILLS

Music Rating App

Designed and built a Music Rating App with React frontend and Python backend.
Enabled users to rate and review music tracks, integrating external music APIs.
Implemented user authentication and personalized interactions for users.

Crime-Eye Statistics App

Created a Crime Eye Statistics App using Ruby on Rails.
Provided real-time crime data visualization for users to identify high-risk areas.
Utilized geolocation data and interactive charts for a user-friendly experience.

Online Ordering System

Developed for a bakery using Python and Django.
Integrated cake builder to design personal cakes.
Incorporated user authentication and admin panel for order management.

EXPERIENCE

Software Engineer, Accenture

March 2025 – Present

Develop and implement software solutions using modern technologies. Contribute across Cloud, AI, Cybersecurity, and DevOps domains. Collaborate on technical projects, solving real-world business challenges. Ensure secure systems by identifying and mitigating vulnerabilities. Agile delivery on multi-client projects in dynamic environments.

Team Delivery Manager, Wilson James

November 2023 – Februrary 2025

Led and managed a team of 30 to ensure efficient service delivery. Coordinated daily operations, enhancing overall efficiency. Acted as a primary contact for clients, resolving issues promptly. Ensured compliance with health, safety and security standards. Managed projects to improve operational performance.

IT Support Engineer, FootfallCam

July 2021 – March 2022

Provided technical support and troubleshooting for FootfallCam products. Managed hardware and software installations, updates and maintenance. Assisted clients with technical issues, ensuring timely resolution. Monitored system performance and conducted regular diagnostics. Documented support processes and maintained technical knowledge base.
